

File storage management problems?

# Storage Management Matrix

is the answer

Easily record, track, locate and retrieve physical files in complex storage facilities

Our innovative barcode based tracking methods reduce instances of misplaced and incorrectly filed items, allowing your business to deliver more timely and accurate service to clients

## Storage Management Matrix

Have you applied for life insurance before? ...then you will know from the vast number of documents to be signed that insurance companies are highly paper-intensive. Despite this inconvenience, all such paperwork is required for the legal purposes and it is therefore impossible to do away with it. Similarly for most firms, the aspiration of having a paperless office is a fallacy and physical document management is still a major challenge facing business today.

The question is, "how is my firm coping with document management today?"

- Do files frequently get misplaced and lost?
- Are employees constantly searching for files?
- Are you looking for ways to improve customer service?
- Do you need to streamline processes to keep competitive?
- Are you getting value for your document management spend?

With the innovative barcode based tracking methods of Storage Management Matrix you can

- eliminate instances of misplaced and incorrectly filed items,
- quickly and effectively locate files in complex storage facilities and
- enable your business to deliver more timely and accurate service to clients

Our Storage Management Matrix solution solves document storage and management problems by enabling easy and accurate recording, tracking, locating and retrieving of physical files in complex storage facilities.
